This is an Erasmus Mundus programme

Yes

### Curriculum/approach description

This interdisciplinary master program is offered to students who seek knowledge in the field of conservation, assessment, planning and development of the material cultural heritage. The different courses are intended to improve the students' ability to independently identify and address complex problems and issues within the different areas of cultural heritage conservation. When specialized in built environment and conservation of built heritage, third-cycle students gain in-depth knowledge about current tools to conduct qualified analyses. The program addresses a wide array of questions, from preservation to contemporary use, planning and development, in accordance with societal aims of participation and sustainability.
