Undergraduate/first cycle degree(s) offered at School/Department

BA Civic Design

Number of years normally used to complete this degree(FT)

4

Part time option

No

Delivery mode

On campus

Number of ECTS

Teaching languages

English

Specialisation within in this Degree/the curriculum

The degree requires an assessed period of work in practice

No

Programme accreditation by a professional body/other institution

Curriculum/approach description

The programme has been designed with the broad aim of providing students with an understanding of the changing features of modern society, and the need to reconcile economic growth and development with the needs of protecting and conserving the environment. Students can choose to specialise in one of the two streams in this programme: urban design and environmental planning.

The curriculum introduces students to the theories of planning, methods of analysis, effective means of communication, planning processes, and creative strategies for implementation. The main objective of the programme is to produce well-equipped graduates with an appropriate range of knowledge and more importantly practical and inter-personal skills which will enable students to embark upon a professional career in planning and related fields of practice.
