The Uniqueness of Planning and its Valorisation

The President's View

Liverpool, 16 July 2009

Scheme of presentation

Promoting Excellence in Planning Education and Research

- Planning: a complex science of practice
- The unique object of planning studies
- Dynamic governance context of planning
- Facing the challenge of double valorisation
- The agenda of AESOP

Planning as complex science of practice

Promoting Excellence in Planning Education and Research

What we learned from the interaction with practices:

- Responsive style of planning
- Normative and interpretative substance
- No search for certainty but dealing with complexity and uncertainty
- Multi layered forms of knowledge
- Planning as process of learning

The unique object of planning studies

Promoting Excellence in Planning Education and Research

- The planning object has 5 dimensions
- Unique in their strong coherence
- Different from all other disciplines
- Through the whole spectrum of planning studies: from the applied level to epistemological concepts
- Different paradigms
- Pragmatic approach resulting in a genuine and very sophisticated object of study

THE OBJECT OF PLANNING THEORY

SENSE OF SPATIAL DIRECTION

- *Change*
- *Preservation*

EXISTING PRACTICES

- *Historic*
- *Social structures*
- *Situational logic*

Knowledge

- *Thought*
- *Knowledge*
- *Experience*
- *Emotion*

EMERGENT PRACTICES

- *Validations of norms*
- *Enforcement of laws*
- *Practical results*

ACTION

- *Mobilisation of resources*
- *Alliances*

- Bologna marks new context of governance
- Paradoxical processes of rescaling:
- Reduction of scale planning studies
- But also enlargement of scale in large local schools
- Enrichment via interdisciplinary cross pollination
- Interdisciplinary systems of quality assurance

Double valorisation

Promoting Excellence in Planning Education and Research

- Valorisation in practice
- And: scientific valorisation
- Completely different ways (different languages, different platforms, different journals)
- Not a strategy of isolation: we don't run a competition on our own
- Self-confident strategy based on the unique object of planning

Agenda AESOP

Promoting Excellence in Planning Education and Research

- All forms of quality assurance focus on education and research
- Promoting research methodology
- Bringing planning knowledge to the highest floors of scientific performance
- The changing culture of congresses, research networks in thematic groups, Young Academics
- Suggestions are welcome

Activities

Promoting Excellence in Planning Education and Research

Thematic Groups: Objectives and activities

Objectives:

- Offer increased possibilities to AESOP members for networking
- Improve quality of AESOP activities

Activities:

- Seminars
- Publications
- Collective submission of bids for research projects

AESOP support:

- Support for meetings at AESOP congress
- Webpage / communication
- Financial support

Activities

Promoting Excellence in Planning Education and Research

Existing Groups:

- Complexity and Planning
- Planning Law and Property Rights
- Urban Design in Planning
- Research Ethics and Planning
- French and British Planning Studies
- New Technologies and Planning
- Transnational and Cross-Border Planning
- Transport Planning and Policy: European Experiences
- Resilience and Risks Mitigation Strategies

Activities

Promoting Excellence in Planning Education and Research

New Groups:

- Evaluation in Planning
chair: Prof. Angela Hull (Heriot-Watt University)
- Monitoring of the European Landscape Convention
chair: Prof. Francesco D. Moccia (University of Naples)
meeting: Saturday 18th July, 12.30-14.00, Civic Design seminar room 2
- Sustainable Food Planning
chair: Prof. Kevin Morgan (Cardiff University)

Activities

Promoting Excellence in Planning Education and Research

Sustainable Food Planning Group launch conference:

9 – 10 October 2009

Stadslandgoed De Kemphaan
Almere, The Netherlands

2009 Best Paper Prize

Promoting Excellence in Planning Education and Research

The AESOP Prize for the Best Paper published in a European planning journal in 2008

Among 17 nominated papers, the jury selected the following five as 'highly qualified':

- **Michael Hebbert:** 'Re-enclosure of the Urban Picturesque. Green-space Transformations in Postmodern Urbanism', in *Town Planning Review*
- **Jochem de Vries:** 'Breaking the Deadlock: Lessons from Cross-Border Spatial Projects in Flanders and the Netherlands', in *disP*

2009 Best Paper Prize

Promoting Excellence in Planning Education and Research

- **Brendan Murtagh, Brian Graham & Peter Shirlow:** 'Authenticity and Stakeholder Planning in the Segregated City', in *Progress in Planning*
- **Vincent Nadin and Dominic Stead:** 'European Spatial Planning Systems, Social Models and Learning', in *disP*
- **Mee Kam Ng:** 'From Government to Governance? Politics of Planning in the First Decade of the Hong Kong Special Administrative Region', in *Planning Theory & Practice*

Promoting Excellence in Planning Education and Research

And the winning paper is.....

Michael Hebbert

‘Re-enclosure of the Urban Picturesque.
Green-space Transformations in
Postmodern Urbanism’,
in Town Planning Review

2009 Excellence in Teaching Prize for Practice

Promoting Excellence in Planning Education and Research

All teaching prize applications 2009
