Curriculum/approach description

Bachelor of Science Urban and Spatial Planning:
Urban and regional planning deal with the various requirements of society (population, economy etc.) to the built environment and open space as well as resulting conflicts and options for action. Urban and regional planners have the task to coordinate the different claims of economy, settlement, recreation, mobility, conservation etc. on space and to attend and manage planning processes.
The bachelor in urban and regional planning is a first job qualifying program. The students obtain a well-founded scientifically and practically orientated education with a wide range of courses. The main goal of the bachelor program is to qualify the students in approaching planning projects, processes and procedures with analytical competences and to develop and visualize solutions with the support of planning instruments, methods and modern computer supported applications. The program's specific quality is an intensive work in study projects. There, teamwork as well as a creative, conceptual and solution orientated approach towards practical planning cases are required.

(Post)Graduate/masters or second cycle degree(s) offered at School/department**Master of Sciences Urban and Spatial Planning**

Number of years normally used to complete this degree(FT)	4
Part time option	Yes

Curriculum/approach description	<p>Further information: http://www.fh-erfurt.de/arc/master-stadt-und-raumplanung/ and http://www.fh-erfurt.de/arc/fileadmin/Material/SUR/flyer_englisch.pdf</p> <p>Master of Science Urban and Spatial Planning: Within the four semester master-program students acquire skills according to the specifications of the urban planner lists of the architectural associations. Additionally, master degree holders are qualified to work in science and research. As in the bachelor-program, study projects form an important element. A precondition for admission is a grade point average of 2,5 in a bachelor program of Urban and Regional Planning, a comparable branch of study or subject related study degrees.</p>
