(Post)Graduate/masters or second cycle degree(s) offered at School/department

MSc Urban and Regional Planning (with RTPI accreditation)

Number of years normally used to complete this degree(FT)	1
Part time option	No
Delivery mode	On campus
Number of ECTS	180
Teaching languages	English
Specialisation within in this Degree/the curriculum	Urban Regeneration and Renewal • Towards Urban Renaissance: Community Involvement in the Built Environment
The degree requires	

MSc Urban and Regional Planning (with RTPI accreditation)

Programme accreditation by a professional body/other institution

RTPI

This is an Erasmus mundus programme

No

Fully accredited by the Royal Town Planning Institute (RTPI), this programme is designed to develop students as reflective practitioners in the planning profession and related disciplines in the built environment, and can be studied either full-or part-time. It is ideal for those who wish to gain a professional qualification that will enable them to pursue and build a career in spatial planning and related areas of regeneration, economic development, housing and transport.

The structure enables students to combine the core modules and material in spatial planning with a specialist focus in fields such as urban regeneration, community based planning, economic development, housing and transport planning.

Programme content

Students study four core modules, plus one optional module and a dissertation of 12,500 words. An optional field trip to a major European city is also offered in the programme.

Curriculum/approach description

Core modules

- The Political Economy of Cities and Regions
- Planning Methods and Techniques
- The Planner in Contemporary Society
- Introduction to Spatial Planning
- Urban Property Development
- Sustainable Cities
- Place Making and Urban Design
- Planning Project

Optional modules

- Urban Regeneration and Renewal
- Towards Urban Renaissance: Community Involvement in the Built Environment

MSc Urban Regeneration and Renewal

Number of years normally used to complete this degree(FT)

1

Part time option

No

Delivery mode

On campus

Number of ECTS

180

Teaching languages

English

Specialisation within in this Degree/the curriculum

The degree requires an assessed period of work in practice

No

Programme

accreditation by a professional body/other institution

This is an Erasmus mundus programme

No

Curriculum/approach description

The programme will appeal to those who want to extend their field of academic knowledge and critical understanding of issues in urban regeneration, as well as to those who are more interested and concerned with policy in practice. In particular, it is aimed at those working in local government and other national, regional and local agencies concerned with the regeneration of urban areas.

Programme content

MSc students study three core modules, plus any three specialist option modules and a dissertation of up to 15,000 words.

Compulsory modules are:

The Political Economy of Cities and Regions
Research Methods in Urban and Regional Studies
Urban Regeneration and Renewal
Optional modules include:

Towards Urban Renaissance: Community Involvement in the Built Environment
Economic Development Policy
Urban Property Development
Place-making and Urban Design
Knowledge and Creative Economies

Number of ECTS

180

Teaching languages

English

Specialisation within in this Degree/the curriculum

The degree requires an assessed period of work in practice

No

Programme accreditation by a professional body/other institution

This is an Erasmus mundus programme

No

This programme will give students a rigorous, multi-disciplinary, research-based knowledge of urban and regional issues, and develop their ability to critically analyse policy.

It will appeal to recent graduates and people in mid-career looking for dynamic and policy-relevant professional development.

Programme content

MSc students study three core modules, plus any three specialist option modules and submit a dissertation of up to 15,000 words.

Curriculum/approach description

Core (compulsory) modules are:

The Political Economy of Cities and Regions
Research Methods in Urban and Regional Studies
Knowledge and Creative Economies
Optional modules include:

Economic Development Policy
Urban Regeneration and Renewal
Towards Urban Renaissance: Community Involvement in the Built Environment
Urban Property Development
Place Making and Urban Design

MSc Resilience and Urban Living

Number of years normally used to complete this degree(FT)

1

Part time option

No

Delivery mode

On campus

Number of ECTS

180

Teaching languages

English

Specialisation within in this Degree/the curriculum

The degree requires an assessed period of work in practice

No

Programme accreditation by a professional body/other institution

This is an Erasmus mundus programme

No

Curriculum/approach description

The programme will give students a broad-ranging, yet grounded understanding of how individuals, organisations, enterprises and / or communities can cope with external stresses and disturbance as a result of rapid social, political, economic or environmental change. These changes also include core societal challenges including demographic change, security and terrorism, climate change and sustainability.

Given that the concept of resilience has become central to academic and policy debates, students will be uniquely placed to identify, explain and offer appropriate responses to the challenges facing individuals, communities and practitioners alike who may be living or working in urban areas.

Core modules
Resilience, Energy and Urban Living
Sustainable and Resilient Cities
Problem-based methods for Urban Resilience
Optional modules
Towards Urban Renaissance: Community Involvement in the Built Environment
Urban Regeneration and Renewal
Urban Property Development
Place Marketing and Urban Design
Geographies of Energy and Capitalism
Environmental Management in Business

MSc Resilience and Urban Living

Negotiating Environmental Controversies
Environmental Risk and Society
Environmental Protection
Weather, Climate and Society
Landscape and Urban Ecology
Sustainable Construction
Construction Management
Energy Policy and Case Studies

English

Specialisation within
in this Degree/the
curriculum

Research students normally have a lead supervisor and a co-supervisor who meet regularly with the student to review and guide their work.

Each research student agrees with their supervisor(s) a programme of training tailor-made to their needs and previous experience. A programme may include:

Research methods modules offered by the University, which students are expected to attend unless they have previously received equivalent training

Any module offered by CURS related to their research

Modules and programmes in other departments

Personal development and skills training provided through the University's Graduate School on subjects including computing, time management, thesis writing, writing for publication, and teaching

All research students give an annual presentation on their work in progress. These take place in research student workshops. These occasions are also opportunities to hear presentations and share views and experiences with other research students and academics and practitioners from the 'outside world'. In addition, students present their work to a research supervisory panel as another means of gauging progress.

We help research students to produce publications arising from their work and encourage them to publish as single authors when appropriate. Many research students are aiming for academic careers and we recognise the importance of providing opportunities for them to be involved in teaching and tutorial work, without compromising their obligations as research students.
