<b>Full time academic staff members</b>	9
<b>Part time staff members</b>	3
<b>Staff members engaged in research</b>	9
<b>Staff members engaged in professional activities</b>	3

## Degree Programmes and Educational Provision

(Post)Graduate/masters or second cycle degree(s) offered at School/department

## Master in Spatial Planning and Urban Design

Number of years normally used to complete this degree(FT)

2

Part time option

No

Delivery mode

On campus

Number of ECTS

120

Teaching languages

Portuguese, English

Specialisation within in this Degree/the curriculum

No

The degree requires an assessed period of work in practice

No

Programme accreditation by a professional body/other institution

No

This is an Erasmus mundus programme

No

Curriculum/approach description

The Master in Spatial Planning and Urban Design aims to provide students with advanced knowledge and skills on the theory and practice of Urban Planning, bearing in mind the national and the international contexts. Through a wide range of courses, students will approach the main issues and challenges cities, as well as metropolitan areas and city regions, are currently facing in a world of rapid and profound changes. The conceptualization, design and implementation of policies, plans and investment projects will be dealt with emphasizing both the reflexive and a professional perspective.

## Doctoral/PhD education offered at School/department

### Doctoral Programme in Spatial Planning

Number of years normally used to complete this degree(FT)

3

Part time option

No

Delivery mode

On campus

Number of ECTS

180

Teaching languages

English, Portuguese

Specialisation within in this Degree/the curriculum

The Doctoral Programme in Spatial Planning is designed to foster advanced knowledge in the field of spatial planning, aiming at explaining, resolving and supporting future public policy agendas. It combines three principles as follows: the definition of a set of core competences in advanced

**Curriculum/approach description**  
**Doctoral Programme in Spatial Planning**

knowledge on spatial dynamics, spatial planning and applied scientific research; the emphasis on specialized areas of knowledge associated with the existing research skills found in the CITTA research centre; and a flexibility principle, allowing for the adaptation of curricula to the specific needs and characteristics of the candidates.
